

DPFManager version 3.1 available to download

DPF Manager has been updated to version [Version 3.1](#). This new version includes new features, improvements and bugfixes. One important change on this release is that we have created two new independent projects for the **implementation checker** and the **policy checker** with the aim of improving the project modularity. All the projects developed by Easy Innova can be explored in our [Github repository](#), and also in the [Maven repository](#).

New Features

- Create and edit configuration files through the CLI
- Create new configuration based on an existing one

Improvements

- Improved performance for large batches of files
- Moved relaxation of standards from implementation checker to policy checker
- Created separate repositories for [Implementation Checker](#) and [Policy Checker](#)
- Updated [TIFF-IT specification](#)
- Default configuration viewable
- Smaller global reports

Fixes

- Solved memory leaks produced when analyzing large amount of files
- Much more robustness against invalid TIFFs
- Fixed periodical checker bug in MacOS

- When an output folder is specified, check if it already exists and ask to overwrite
- Show the correct reports folder in the log messages
- Several fixes in METS report
- Uninstaller now removes all the files (when asked to)

Many of these points have been suggested by the users. So don't hesitate to use the [issue tracker](#) or any of the other channels available ([twitter](#), [forum](#)) to contact us and provide any feedback on things that could be improved.

Download NOW! Available for Mac OS X, Linux & Windows.

View the presentation

The image shows a presentation slide titled "Scope of the Project". On the left, there is a dark grey sidebar with the text "Are your files ready for digital preservation?" and "Download for free all information about the most advanced TIFF conformance checker." Below this is a green "DOWNLOAD" button with a download icon. The main content area is titled "Scope of the Project" and features three main sections: 1. "DPF Manager Open source software Main features" with the DPF Manager logo and a person's profile picture. 2. "Standardization process TIA Standard Initiative Research" with the TIA logo and a person's profile picture. 3. A section with the "easy" logo and another person's profile picture. The slide also includes logos for the European Union, the University of Jyväskylä, and the PRETOSHA project.
