

ENRICH 2013 Workshop

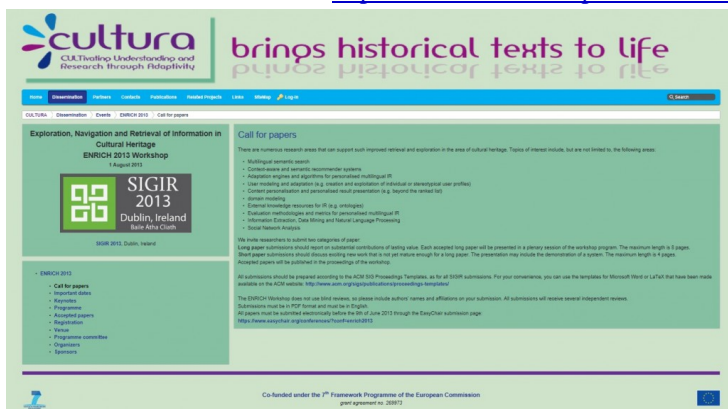

In the framework of SIGIR conference, **ENRICH workshop** will be hosted in the Long Room Hub, at the Digital Arts and Humanities Research Institute of Trinity College Dublin, on **August 1st 2013**.

ENRICH is supported by EU projects [CULTURA](#) and [Paths](#), to discuss topics of interest related, but not limited to, the following areas:

- Multilingual semantic search
- Context-aware and semantic recommender systems
- Adaptation engines and algorithms for personalised multilingual IR
- User modeling and adaptation (e.g. creation and exploitation of individual or stereotypical user profiles)
- Content personalisation and personalised result presentation (e.g. beyond the ranked list)
- Domain modeling
- External knowledge resources for IR (e.g. ontologies)
- Evaluation methodologies and metrics for personalised multilingual IR
- Information Extraction, Data Mining and Natural Language Processing
- Social Network Analysis

Official website of the event: <http://www.cultura-strep.eu/events/enrich-2013/call-for-papers>

Call for papers is open until 9th June.
