

ENRICH 2013 Workshop

In the framework of SIGIR conference, **ENRICH workshop** will be hosted in the Long Room Hub, at the Digital Arts and Humanities Research Institute of Trinity College Dublin, on **August 1st 2013**.

ENRICH is supported by EU projects [CULTURA](#) and [Paths](#), to discuss topics of interest related, but not limited to, the following areas:

Multilingual semantic search

Context-aware and semantic recommender systems

Adaptation engines and algorithms for personalised multilingual IR

User modeling and adaptation (e.g. creation and exploitation of individual or stereotypical user profiles)

Content personalisation and personalised result presentation (e.g. beyond the ranked list)

Domain modeling

External knowledge resources for IR (e.g. ontologies)

Evaluation methodologies and metrics for personalised multilingual IR

Information Extraction, Data Mining and Natural Language Processing

Social Network Analysis

Official website of the event: <http://www.cultura-strep.eu/events/enrich-2013/call-for-papers>

A screenshot of the ENRICH 2013 Call for Papers website. The header features the cultura logo and the tagline "brings historical texts to life". The main content area is titled "Call for papers" and lists various topics of interest such as Multilingual semantic search, Context-aware and semantic recommender systems, and Adaptation engines and algorithms for personalised multilingual IR. It also includes information about the submission process, including the deadline (30th June 2013) and the location (SIGIR 2013, Dublin, Ireland).

Call for papers is open until 9th June.

Organizers:

Prof. **Séamus Lawless** (School of Computer Science, Trinity College Dublin, Ireland)

Prof. **Maristella Agosti** (Department of Information Engineering, University of Padova, Italy)

Dr. **Paul Clough** (Information School, University of Sheffield, UK)

Prof. **Owen Conlan** (School of Computer Science, Trinity College Dublin, Ireland)
