Europeana XX Century of Change: kick-off meeting

img. credits: Fortepan via Europeana.

A new CEF funded project has just started, and the kick-off meeting was celebrated in Hilversum on 5-6 March 2020, hosted by project coordinator the Netherlands Institute for Sound and Vision. It was a lively and productive event with presentations, discussions, planning, and various groups activities, in the lovely Institute's building. Some of the partners representatives could not travel to Holland and a direct streaming was therefore set up, which guaranteed inclusive participation.

In this project, 5 Domain and Thematic Aggregators join forces with technology and educational partners, to stimulate reflection and debate on European recent history, and to improve and enrich Europeana.eu, the European digital library. Overarching theme: the 20th century as a gamechanger, whose impact on society is extensively documented in photographs, audiovisuals and other types of media.

We're heading for?

- a **new Thematic Collection in Europeana.eu** with compelling editorials
- 100.000 new **high quality records**
- **smart tools** to support curators
- **machine translation and semantic enrichment** to hundreds of thousands of Europeana records
- an online and on site **outreach strategy**
