

## INCULTUM presented at Europeana 2021

The Europeana conference is the annual flagship event in the sector of digital cultural heritage. The **Europeana 2021: Recover, Rebuild, Grow** took place online in November, with 70% of the programme ? over 30 sessions ? co-created with cultural heritage professionals across the sector who responded to a call for proposals. Among those, the WEAVE project community was happy to present the work that is ongoing for enabling engagement of various communities with their cultural heritage, during a interactive session introduced by Antonella Fresa on 11th November.

Within WEAVE project's presentation, the collaboration established with INCULTUM was highlighted, to showcase the effort done by INCULTUM in engaging local communities with their territory and heritage, that is of relevance also in the light of leveraging digital resources and tools to support such engagement.

The session was an occasion to communicate about INCULTUM to the over 100 session's participants.

The WEAVE logo is at the top left, with the tagline 'Widen European Access to Cultural Communities Via Europeana'. Below it is a grid of partner logos including IN2, ERIAC, PHOTOCONSORTIUM, Coventry University, CRDI, ARCTUR, topfoto, NOVA-FCSH, think.code, KU LEUVEN, and europeana. To the right of the grid is the text 'join us at weave-culture.eu'. Below the grid is a box titled 'Collaborations established with other projects:' containing logos for UNCHARTED and INCULTUM. At the bottom, there is a call to follow the WEAVE blog with a URL and the DIGITAL CULTURE logo and website.
