

Joint EIUG/IIUG Conference, European and Irish Innovative Users Group

A joint conference of Irish Innovative Users Group and European Innovative Users Group will take place in Dublin at Trinity College, of interest to those using Innovative Interfaces Inc. (III) library systems and products such as Millennium, Sierra, Encore. There are approximately 120 delegates due to attend.

Irish E-Space partner [LGMA](#) is of course taking this opportunity for project dissemination!

There will be delegates from libraries around Europe so the event will be a good arena for promoting the project to the wider library sector that will include academic as well as public libraries.

The programme and more details can be found [here](#)
